

I had a nice meet up with Ed/ADOWN and his wonderful wife Nancy as they travel through New England, activating a park in each state as they go. Today was US-7508 Pulaski State Park in RI. Ed got delayed in Nor'easter road closures so I activated and put 34 in the log on the 20m and 40m SSB. Ed activated when he got there and put 14 in his log before he needed to move on to the next state. We stayed dry activating from my SUV using my 891 at 100w and ATAS 120a. Ed was happy to put some familiar call signs in his log and some of his club members too. Swapping stories, we found out we both have four kids, are both private pilots, and both have been married for 54 yrs! Safe travels Ed and Nancy! Great to meet you both. 73 and POTA on. Fran/KC1NDQ
